Sulphur	0.3 %	0,8 % max
% Passing through sieve 63 μ	70 %	50 % min
Loose bulk Density	0.70 g/l	

Other Information
<p>Benthul 50 is a mixture of 50 % bentonite and 50 % coal with a sulphur content, volatile matter, ash content and swelling index suitable for its application.</p> <p>Benthul 50 has many advantages. On the first hand, the amount of bentonite present in the product improves its handling; on the other hand the presence of coal improves the surface quality of the castings, increasing its refractoriness decreasing pores and releasing volatile reducing agents</p>
